Every Participant must form a team comprising between three (3) to five (5) members to participate in the GET Challenge (hereinafter the “Team”).

At least one (1) member of the Team must be able to communicate effectively in English.

Part B

A Team Statement

What problems that your team want to solve them during and beyond COVID 19?

Ever since the COVID 19 outbreak started, social distancing has been practicing as the number of people are being infected increase significantly. The outbreak results in many problems, and beyond that, there is a particular problem related to the medical field. The problem that we face during this time is that people are afraid of being infected by the virus, so even if people have some minor injuries or diseases, and want to consult with doctors, they cannot go to the hospital directly. Because both doctors and clients are afraid of meeting people with each other. Thus, we want to create an online platform where clients can do the consultation with doctors about any problem that they have. The platform also consists of online pharmacies where people can buy various types of drugs or medicines that they want from pharmacies that we cooperate with. On top of that, we also have delivery services to all the customers or clients which makes them more convenient without having to go out to buy their medicines or drugs physically.

Why your team and why now? (Please tell us your rational)

It is mentioned that in terms of online consultation service with doctors or buying medicines online is not available in Cambodia yet. Therefore, this is a great opportunity for us to grab and create a startup from it. Besides, as a young generation, we think it is our obligation to solve this kind of social problems for the people and the country.

Why should we start now? Mainly, as we mentioned above the virus is contagious; thus, people are afraid of being infected. With an online platform for consulting, people are likely to use our services as it is really reliable and convenient for them. In difficult times like these days, we believe that this service will provide much convenience and safety to our citizens.

Who are in the team and what are their roles?

Kevin Keo: Team Leader

Sovannarith Chem: Business Admin

Gechpor Kim: Marketing Admin

Sun Hyang Song: Financial Admin

Sokhak Vathana Ann: I.T Admin
